

HR SHORTLIST REPORT

Role: N/A | Total Candidates: 5
Report Date: 14 May 2026 18:58

Candidate Rankings & Decisions

Rank	Candidate	Similarity	Total Score	Decision
1	Jane Smith	51.6%	8.95/10	HIRE
2	Vikram Singh	12.5%	8.1/10	HIRE
3	Arjun Mehta	22.0%	5.65/10	MAYBE
4	Priya Sharma	27.4%	5.25/10	MAYBE
5	Rahul Verma	0.0%	1.75/10	NO HIRE

Executive Visualization

Detailed Evaluation: Jane Smith

Dimension	Score	Justification
Skills Match	10/10	Candidate possesses 100% of the required technical stack, including advanced MLOps tools like Docker and MLflow.
Experience	8/10	3.5 years of experience exceeds the 2-year minimum. Experience in financial modeling aligns perfectly with the Fintech domain requirement.
Education & Certs	9/10	M.Tech from a premier institution (IIT Delhi) combined with two highly relevant, advanced professional certifications.
Projects	9/10	Strong portfolio demonstrating production-level deployment, low-latency engineering, and high-performance modeling metrics.
Communication	8/10	Summary and project descriptions are concise, data-driven, and structured effectively.

Detailed Evaluation: Vikram Singh

Dimension	Score	Justification
Skills Match	9/10	Candidate possesses all core technical requirements (Python, TensorFlow, Docker, Git). While scikit-learn is not explicitly listed, it is foundational to the ML stack and implied by the M.Tech/MLOps background.
Experience	6/10	Candidate has 4 years of experience, exceeding the 2-year minimum. However, the profile lacks explicit experience in the required domains (Fintech, E-commerce, or SaaS).
Education & Certs	10/10	Excellent academic background from a top-tier institution (IIIT Hyderabad) complemented by highly relevant professional certifications (AWS ML Specialty, CKA).
Projects	8/10	Strong portfolio demonstrating end-to-end capabilities, specifically in MLOps and production-grade deployment, which aligns well with senior-level expectations.
Communication	8/10	The summary and project descriptions are concise, professional, and highlight technical impact effectively.

Detailed Evaluation: Arjun Mehta

Dimension	Score	Justification
Skills Match	6/10	Candidate possesses core Python, SQL, and scikit-learn skills but lacks critical production-level tools required for the role, specifically Docker, Git, and TensorFlow.
Experience	3/10	While the candidate meets the 2-year threshold, the title 'Senior Data Scientist' requires significant depth. The candidate's background is in BI Analysis, which is adjacent but lacks the seniority and domain-specific experience (Fintech/E-commerce/SaaS) requested.
Education & Certs	8/10	Strong academic foundation with an M.Sc in Statistics, complemented by relevant ML specialization certification.
Projects	6/10	Projects demonstrate practical application of ML, but they are standard portfolio pieces and lack the complexity or scale expected for a Senior-level role.

Dimension	Score	Justification
Communication	7/10	The summary is concise and professional, effectively highlighting the candidate's core value proposition.

Detailed Evaluation: Priya Sharma

Dimension	Score	Justification
Skills Match	6/10	Candidate matches 5/7 required skills. Missing critical 'TensorFlow' and 'Docker' expertise required for a Senior Data Scientist role.
Experience	2/10	Candidate has 1.5 years of experience, failing the 2-year minimum requirement and significantly under-qualified for a 'Senior' level position.
Education & Certs	7/10	Strong academic background from a reputable institution (VJTI) and relevant supplemental certification.
Projects	6/10	Projects are relevant to the domain but lack the complexity and scale expected for a Senior Data Scientist role.
Communication	7/10	Summary is concise and highlights key technical contributions effectively.

Detailed Evaluation: Rahul Verma

Score Breakdown: Rahul Verma

Dimension	Score	Justification
Skills Match	0/10	Candidate possesses zero of the required technical skills (Python, SQL, ML, etc.). The provided skill analysis in the prompt was factually incorrect.
Experience	3/10	Candidate has 3 years of experience in Finance, not Data Science. Lacks the 'Senior' level experience required for this specific role.
Education & Certs	4/10	MBA Finance is relevant for Fintech, but lacks the technical certifications or quantitative degree required for a Senior Data Scientist role.
Projects	0/10	No projects listed to demonstrate data science capabilities or technical application.
Communication	4/10	Summary is clear and concise, but fails to articulate how current skills translate to the target role.
